

Every Signature™ knee starts with something unique: You.

personalized patient care

No two knees are alike. That's why Biomet developed Signature Personalized Patient Care. It's an amazing new technology that allows surgeons to provide for a more custom fit of the Vanguard® total knee. Here's how it works. The Signature™ knee uses your MRI, instead of a traditional x-ray, so your surgeon can personalize your implant placement. We call it Patient-Matched Technology, but what it really means is a knee replacement that's unique to you. To learn more or to find a Signature™ trained surgeon in your area, call or visit our website. The Signature™ knee from Biomet. Knee replacement technology that's inspired by you.

There are potential risks to knee replacement surgery, including loosening, dislocation, fracture, wear, and infection, any of which can require additional surgery. For additional risk information, visit www.biomet.com and read "Patient Risk Information" for the "Vanguard" Complete Knee System™, and talk to your surgeon. The life of any joint replacement will depend on your physical condition, activity levels, willingness to follow surgeon's instructions, and other factors. Only an orthopedic surgeon can determine whether you are a candidate for knee replacement surgery.
